

MATTHEW GALVIN

OVERVIEW

Proven technical leader with over a decade of experience solving problems in the healthcare and biotechnology industry. My professional interests lie at the intersection of human health, equity, and philosophy.

EXPERIENCE

Dana-Farber Cancer Institute

Associate Director of Operations Sep 2025 - Present

- Technical leadership and vision for informatics solutions.
- Lead and mentor a team of clinical and software professionals.
- Manage operational and capital budgets.

Software Architect Aug 2022 - Sep 2025

- Engineering team lead for the MatchMiner project.
- Python machine learning in support of precision oncology efforts.
- ETL pipeline development and deployment.

People Management, Project Management, Technical Leadership

Invitae

Bioinformatics Pipeline Engineer Jun 2021 - Jul 2022

- Whole genome pipeline development.
- Germline variant calling and data analysis.
- Maintenance and on-call support for reproductive health pipelines.

Bioinformatics, Pipeline Development

Providence Health & Services

Bioinformatics Scientist Nov 2020 - Jun 2021

- Whole exome & T/N pipeline development.
- Bulk/scRNA data processing & machine learning.
- Analysis and curation of AACR Project GENIE data.

Genomics Software Engineer May 2019 - Nov 2020

- Oncogenic pipeline development and data analysis.
- Full stack web development.
- Application owner and engineering mentor.

Engineering Mentorship, Data Analysis, Web Development

Illumina, Inc.

Engineer, Life Cycle Management Nov 2017 - Apr 2018

- Manufacturing software automation.
- Vendor quality control and cost management.
- Establish software best practices with manufacturing partners.

Software Test Engineer Sep 2014 - Nov 2017

- Lead software test engineer for mid-throughput sequencers.
- Engineering management and product planning.
- Instrumentation software verification and validation.

Product Development, Software Verification, Genomics

EDUCATION

B.S. Chemical Engineering
Oregon State University, 2014

SKILLS

- Technical Leadership
- Communication
- Project Management
- Product Development
- People Management
- Engineering Mentorship
- Budgeting
- Stakeholder Management
- Clinical Informatics
- Genomics
- Bioinformatics
- Clinical Trials
- Instrumentation
- Software Architecture
- Pipeline Development
- Machine Learning
- Artificial Intelligence
- Experimental Design
- Containerization
- Cloud Computing
- Web Development
- Data Visualization
- Data Analysis
- Database Design
- Software Verification & Validation
- $\LaTeX$

LANGUAGES

Experienced in **Python**, **R**, **Ruby**, **JavaScript**, and **Shell Scripting**.
